VANCOUVER

that achieve significant gains without the risk of fully invasive surgery—and also offers » fillers such as Radiesse, which Jean says is a perfect treatment for facial wasting.

## FALSE CREEK SURGICAL CENTRE

555 W. Eighth Ave., 6th floor, Vancouver, 604-739-9695, [falsecreeksurgicalcentre.com](http://falsecreeksurgicalcentre.com).

One of Vancouver's larger cosmetic surgery centres, this one is licensed for overnight stays and maintains a 1:3 nurse-to-patient ratio. Natural light, stone and wood add to soothing recoveries after trans-umbilical breast augmentations, tummy tucks, liposuction, and many other cosmetic surgical offerings. Injectables are also available (collagen, Restylane, Botox), as are chemical peels and laser skin resurfacing, and a new treatment called Obagi Nu-Derm, which corrects uneven pigmentation, age spots, sun damage and more.

## DR. DWAYNE KARATEEW

805 W. Broadway, Suite 1906, Vancouver, 604-879-9660, [dentistrybydesign.ca](http://dentistrybydesign.ca).

"A few rock stars, some celebrities. Their autographs are on the wall," laughs Karateew—but he's not joking about his famous clientele. This cosmetic dentistry clinic is devoted to making smiles brighter whether you're a star or not. Veneers, crowns and other things you might need are available, as well as a few things you may simply want, like Zoom2 and BrightSmile. (Bonus: A take-home touch-up kit is free.) Most interesting is the new "supernatural smile" program, in which tiny, natural-looking imperfections are created in reconstructed smiles, so you don't look like the Cheshire Cat.

## SKINWORKS

3568 and 3578 W. 41st Ave., Vancouver, 604-737-7100 and 604-733-9711, [skinworks.ca](http://skinworks.ca).

Another husband-and-wife team, Dr. Frances Jang and Dr. Nick Carr joined forces at this modern Kerrisdale office a few years ago. Jang is on the vanguard of laser treatments, injectables (Botox, Restylane, Juvéderm and Radiesse among them), and all sorts of other non-invasive dermatological services. The Fraxel laser treatment, with its short recovery times, has been garnering great results for melasma, skin tightening and resurfacing among clients. Carr, the division head of plastic surgery at the University of British Columbia and Vancouver General Hospital, was the first in Western Canada to do the non-scarring trans-umbilical breast augmentation (TUBA). He's also the doctor to see for
